2a) Click on „index.html”.

Your Browser\* opens with the Tutorial.

2b) Install an ICON on the Desktop with a connection to „index.html”. Clicking on this Icon will open the Tutorial from now on.

2) Inserting the CD opens the Tutorial with the file „autorun.inf” automatically. If Autostart is not activated search for the „index.html” file and click on it.

- \* Use the Mozilla Browser if you have faults with the display
- Use the newest Browser-Version in any case.  
Tutorial 2009 was tested with „Internet Explorer 8” (Win), Mozilla and Opera.
- Use the newest **Flash Player (Adobe)**. **This is for listening and watching** Videos and Music without problems.  
If the Browser asks for installing the newest Flashplayer I recommend to confirm.  
The Plugin will be installed then (~ 2MB).
