2) Inserting the CD opens the Tutorial with the file „autorun.inf” automatically. If Autostart is not activated search for the „index.html” file and click on it.

Hinweise:

- * Use the Mozilla Browser if you have faults with the display
- Use the newest Browser-Version in any case. Tutorial VSL was tested with „Internet Explorer 8” (Win), Mozilla and Opera.
- Use the newest Videos and Music without problems. If the Browser asks for installing the newest Flashplayer I recommend to confirm. The Plugin will be installed then (~ 2MB).
